

EXECUTIVE SUMMARY: \$1.5B WHISTLEBLOWER & IP THEFT CLAIM

REF: SEC TCR #17757-398-558-458

I. OVERVIEW

This mandate involves the immediate monetization of a \$1.5 billion claim against PricewaterhouseCoopers Global Network (PwC) for whistleblower retaliation, intellectual property theft, and systematic administrative silence. The claim is supported by SEC-validated evidence (TCR #17757-398-558-458) demonstrating that PwC executed the Claimant's proprietary risk-mitigation plan to save a \$1.1B asset, then imposed a 15-day "administrative blackout" to avoid payment.

II. TIMELINE – PwC'S PREMEDITATED MISAPPROPRIATION

- March 30 – April 1, 2026: Claimant provided PwC Japan TMT Group with proprietary IP and execution logic for LoveLive asset restructuring, specifically identifying the \$1.1B asset risk tied to talent compliance (Coco Hayashi). A Japanese-language warning was sent, copying Sony Music Executive Vice President.
- April 2, 2026: Formal risk warning issued to Wilson Chow (PwC Global TMT Head). Claimant demonstrated that without the proprietary mitigation plan, the asset would suffer immediate impairment.
- April 2–3, 2026 (The 48-Hour Execution): PwC physically executed Claimant's proprietary protocol – talent withdrawal, public apology, crisis containment. PwC successfully saved the \$1.1B asset using Claimant's IP. No agreement was signed, no compensation was paid, and no employment offer was provided.
- April 3 – April 17, 2026 (The 15-Day Administrative Blackout): PwC Global Leadership (including Global Chairman and CCO) imposed a 15-day administrative silence – zero replies, zero performance, zero payment. This constitutes deliberate attrition to force the whistleblower to abandon the claim.

- Forensic Evidence: Digital logs confirm 192+ unauthorized accesses to Claimant's evidence links by PwC and its outside counsel (William Burck / John Quinn of Quinn Emanuel). This includes 19 unauthorized intrusions into Claimant's private architectural renovation plans (after Claimant had explicitly entrusted all matters to Mitsui Real Estate).

III. REGULATORY FILINGS & LEGAL BASIS

- SEC Whistleblower Complaint (TCR #17757-398-558-458): Filed under penalty of perjury. Whistleblower Retaliation (SEC Rule 21F-17): The administrative blackout directly violates SEC whistleblower protection rules ("silence as retaliation").
- Unjust Enrichment / Quantum Meruit: PwC derived a \$1.1B financial benefit solely from the unauthorized implementation of Claimant's IP.
- New York AGC Complaints: Formal complaints filed against William Burck and John Quinn for professional misconduct, administrative interference, and conflict of interest.

IV. CLAIM VALUATION & MANDATE REQUIREMENTS

- Primary Claim Value: \$1,500,000,000 (one point five billion US dollars).
- Valuation Basis: Anchored in PwC's internal TMT asset impairment metrics and the immediate market recovery generated by Claimant's IP.
- Monetization Requirement: \$50,000,000 non-refundable advance payment to Claimant as a condition for assigning exclusive participation rights in the primary recovery. The advance shall be credited against the funder's share of recovery.
- Secondary Asset (Optional): Upon successful settlement of the primary claim, the funder shall have the exclusive option to pursue a separate \$300,000,000 professional liability claim against Quinn Emanuel leadership. Terms (e.g., 50% of recovery to funder, no additional upfront) to be mutually agreed in a separate term sheet.

V. COUNSEL STATUS

Claimant is in final discussions with Bill Reid of Reid Collins & Tsai LLP. The retention agreement will be executed immediately upon funding confirmation. Disbursement of the advance and formal complaint filing can occur within 48 hours of a signed term sheet.

VI. EVIDENCE PACKAGE ACCESS

The full evidentiary package – including original emails to PwC Global TMT leadership, forensic access logs, SEC confirmation, AGC filings, and PwC's employment indications (offer1.0 / offer2.0) – is ready for disclosure under a mutual Non-Disclosure Agreement (NDA).
